

IGI Hybrid Petrolatums

IGI Hybrid Petrolatums are the newest innovation from our applications chemists. They have come up with the best of both worlds. They have taken the best qualities of petrolatum and combined it with a vegetable source. The resulting products are Hybrid Petrolatums which have significantly different esthetics than conventional petrolatums. They also have considerable amounts of renewable vegetable resource. Hybrid Petrolatums will find applications in creams, lotions, lip care products, body washes and may other applications where the occlusive properties of petrolatum can benefit the formulation.

TYPICAL PROPERTIES OF HYPET J R-4452B

	Melting Point ASTM D-127 °F (°C)	Cone Penetration ASTM 937 dmm @ 77°F (°C)	Color Lovibond 2" Cell
HyPet J	138 (58.9)	180	24Y 1R

INCI Name: Microcrystalline Wax (and) Simmondsia Chinensis (Jojoba) Oil
